Product designer focused on foundational product experiences at scale. Most recently at Shopify, I worked across Email, Marketing, and Analytics on tools that help merchants plan campaigns, understand performance, and make better decisions with their data.

I'm effective in ambiguous, cross-team problem spaces where clarity, judgment, and follow-through are critical. My work often focuses on simplifying complex systems, aligning teams around shared primitives, and shipping solutions that hold up as products and organizations evolve.

Senior Product Designer, Shopify

2022-2026

Designed core product experiences across Shopify Email, Marketing, and Analytics to help merchants plan, execute, and evaluate their marketing and performance.

Led design for send-time optimization in Shopify Email, translating benchmark and store-level conversion data into delivery-time recommendations that improved campaign performance and contributed to downstream GMV.

Designed a new campaign primitive in Shopify Admin, enabling merchants to organize, track, and evaluate marketing efforts through a unified structure that scales across channels and integrates with analytics.

Led design across key analytics initiatives such as cohort retention enhancements, entity-based filtering, multi-mode report creation, and report annotations, improving how merchants explore, interpret, and collaborate around performance data.

Senior Product Designer, Empatico

2021-2022

Led design efforts to establish a unified design system for an education-focused nonprofit platform serving educators across 90+ countries.

Redesigned the registration experience, reducing average signup time by 80% and removing a key barrier to teacher adoption.

Product Design Lead, Lucky Orange

2018-2021

Owned end-to-end design for a next-generation enterprise analytics suite spanning session replay, heatmaps, surveys, and reporting for a B2B SaaS platform.

Established and scaled an accessible design system that improved product cohesion and enabled faster iteration as the business and team grew.

Product Design Lead, Signal Kit

2015-2018

Led product design from early discovery through scale for a communication platform adopted by over 200 school districts nationwide and later acquired.

Interactive Designer, Instrument

2012-2015

Contributed to large-scale digital initiatives for global brands including Google, YouTube, Beats, and Nike, delivering accessible, content-driven web experiences.

Skills

Product strategy & systems design · Data-informed UX · Analytics and reporting experiences · Design systems · Information architecture · Motion design · Cross-functional collaboration · AI-assisted workflows for research, evaluation, and prototyping

Education

B.S. Business Management, Kansas State University
A.S. Graphic Design, Johnson County Community College
